Professional Profile

High-achieving Systems Engineering student and fast learner. Co-founder of a process-automation initiative, founding team member of international cloud communities, and **AWS Certified AI Practitioner**. Full-stack developer with production experience (React Native, Supabase) and hands-on work integrating AI agents into real workflows. Proven ability to solve technical problems under pressure in hackathons and development competitions. Seeking a technology internship where he can apply his self-taught mindset to real-world problems.

Education

B.Sc. in Systems Engineering | Universidad Privada Boliviana (UPB) 2025 – Present (2nd Year)
Cochabamba, Bolivia

- **Outstanding academic performance:** Member of the program's Honor Roll.
- **Academic leadership:** Teaching Assistant for Calculus and Physics, support first-year students and school students with all exact subjects.
- Nine-semester degree program with rigorous analytical and technological training.

Technical Skills

Languages: Python, C#, Java, Kotlin, TypeScript
Frameworks: React Native (Expo), React, Zustand, React Query, Supabase
Tools: Git, GitHub, Visual Studio Code, SQL, n8n, Claude Code
Cloud computing: AWS Certified AI Practitioner; Amplify, IAM, Lambda, S3, EC2.
Spoken languages: Spanish (native), English (B2–C1)

Relevant Experience and Activities

Founding Member | Meliorem 2024 – Present
Process automation and digitalization for SMEs · Cochabamba, Bolivia

- Co-founded a company focused on operational efficiency and digital transformation for local small businesses.
- Designs and deploys automated, scalable workflows with n8n.
- Configures and integrates artificial intelligence agents to optimize business operations.

Core Team (Founding Member) | AWS Student Builder Group UPB 2024 – Present
Amazon Web Services · Cochabamba, Bolivia

- Founding team member of the first AWS Student Builder Group in Cochabamba.
- Promotes cloud technology adoption through workshops and student collaboration.
- Led an AWS Amplify workshop (React + Vite + Amplify Gen 2), producing documentation, slides and a five-module hands-on guide.
- Resolved IAM permission issues and managed the cleanup of orphaned Lambda resources after deployment.

Projects and Competitions

World Cup 2026 Predictions App github.com/Jusepe123

- Full-stack mobile application built with React Native (Expo SDK 52), TypeScript, Supabase, Zustand and React Query.
- Actively used by approximately 20 real users, with live score synchronization, a leaderboard and server-side data validation.
- The GitHub profile includes other active projects and a research agent built as a Claude Code subagent.

Instrumentation Projects — Arduino & MATLAB UPB

- **Ultrasonic radar:** HC-SR04 sensor, servo-driven sweep and real-time polar visualization in MATLAB.
- **IoT dashboard:** multi-sensor panel for temperature, light and vibration with a tabbed interface.
- **Structural integrity simulator:** seismic monitoring and real-time serial communication using MATLAB App Designer.

Hackathon CochaTech 2025 2nd Place

- Built an MVP under strict time constraints, demonstrating adaptability, resilience and teamwork.

GameJam Plus 2025 Incubation Phase

- Advanced to the international incubation phase after designing and programming a functional video game prototype.

Selected Certifications

Amazon Web Services (AWS)

- [AWS Certified AI Practitioner](#) — Aug 2026
Valid through Aug 2029
- AWS Cloud Clubs Core Team — Mar 2026
- AWS Educate Getting Started with Compute — Mar 2026
- AWS Educate Getting Started with Storage — Apr 2026

Cisco Networking Academy

- Junior Cybersecurity Analyst — Jun 2024
- Python Essentials 1 & 2 — Jun 2023
- Networking Basics / Intro to Data Science — 2023
- Learn-A-Thon Award Recipient — 2023, 2024
