Professional Profile

Honor Roll Systems Engineering student, certified as an **AWS Cloud Practitioner and AI Practitioner**. Co-founder of Meliorem and the AWS Student Builder Group UPB. Full-stack production experience and hands-on integration of AI agents and automated workflows. Seeking employment opportunities in AI, cloud or software development.

Education

B.Sc. in Systems Engineering | Universidad Privada Boliviana (UPB) 2025 – Present
2nd year; nine-semester program. Honor Roll. Teaching Assistant for Calculus and Physics; tutoring first-year university and school students in mathematics and sciences.

Technical Skills

Languages	Python, TypeScript, C#, Java, Kotlin
Frameworks	React Native (Expo), React, Zustand, React Query, Supabase
Tools	Git, GitHub, SQL, Visual Studio Code
Cloud / AWS	EC2, S3, IAM, Lambda, Amplify
AI	AI agents, generative AI, n8n automation, Kiro, Claude Code
Spoken	Spanish native, English B2–C1

Relevant Experience and Activities

Founding Member | Meliorem 2024 – Present
Co-founded a process automation and digitalization company for SMEs in Cochabamba. Design and deploy scalable n8n workflows and integrate AI agents to optimize business operations.

Core Team / Founding Member | AWS Student Builder Group UPB 2024 – Present

- Founding team member of Cochabamba's first AWS Student Builder Group.
- Delivered multiple workshops on EC2, S3, Amplify and Kiro.
- Organizer of the AWS Student Community Day Cochabamba, Bolivia 2026, held on October 10 at UPB Cochabamba alongside the AWS Student Builder Groups.

Projects and Competitions

World Cup 2026 Predictions App React Native / TypeScript / Supabase
Full-stack mobile app used by approximately 20 users, with live scores, a leaderboard and server-side validation; Expo SDK 52, Zustand and React Query.

Momentum - Multisport Training Tracker React / Supabase / Expo
Web and Android platform for strength, running and cycling. Unified load (RPE × duration), ACWR, progress and records with Recharts; background GPS tracking and an offline queue.

Instrumentation (UPB) | Arduino & MATLAB: HC-SR04 radar with servo sweep and polar visualization; IoT dashboard for temperature, light and vibration; structural integrity simulator with seismic monitoring and serial communication in MATLAB App Designer.

- **Hackathon CochaTech 2025 - 2nd place:** MVP built under strict time constraints.
- **GameJam Plus 2025 - International incubation:** designed and programmed a functional video game prototype.

Selected Certifications

Amazon Web Services
AWS Certified Cloud Practitioner - 2026
AWS Certified AI Practitioner - Aug 2026
AI Practitioner valid through Aug 2029
AWS Cloud Clubs Core Team - Mar 2026
AWS Educate: Compute / Storage - Mar / Apr 2026

Cisco Networking Academy
Junior Cybersecurity Analyst - Jun 2024
Python Essentials 1 & 2 - Jun 2023
Networking Basics / Intro to Data Science - 2023
Learn-A-Thon Award Recipient - 2023, 2024
